

MALCO[®] CW-37[™] PREMIUM CAR & TRUCK WASH CONCENTRATE (1057)

DESCRIPTION

CW-37[™] is a phosphate-free and biodegradable formula designed to remove dirt, road film and other common automotive soils quickly, easily and thoroughly in automatic, semi-automatic and hand car washes. It produces large quantities of hard-working suds which make it ideal for most cars, trucks and motorcycles. The high lubricity formula in CW-37 is designed to help prevent brush marks when using in foam brush applications. Will not remove wax.

DIRECTIONS

Recommended dilution rate is 1:400. Add one ounce of CW-37 per three gallons of water. More or less concentrate may be necessary depending on water softness. Clean using a wash mitt or wash sponge. Rinse thoroughly. Dry with a chamois or clean, soft towel. For automatic wash systems, consult equipment manufacturer's solution preparation recommendations to produce the desired solution concentration.

FEATURES AND BENEFITS

High-foaming formula clings to vehicle	Makes washing fast and easy
Highly concentrated	Low cost per use (1:400 dilution)
High lubricity	Helps prevent brush marks

PACKAGE SIZES

- 1 gallon (Part number: 105701)
- 5 gallon (Part number: 105705)
- 55 gallon (Part number: 105755)
