

MALCO[®] SUPER-DUTY[™] HEAVY-CUT COMPOUND (1276)

DESCRIPTION

Super-Duty[™] is a versatile cutting compound designed to remove heavy sand scratches and oxidation from both clear coat painted and gel coat surfaces. It will easily remove P1500 grit and finer sand scratches. When used with a 100% twisted wool pad, Super-Duty Compound works fast and leaves a high-gloss finish on any automotive, marine or industrial coating.

DIRECTIONS

Shake well before using. For best results use with a Malco 100% twisted white wool cutting pad (810051). Apply a 2" dab of Super-Duty Compound for a 2' x 2' section and spread with the cutting pad. Buff at speed between 1600 - 2200 rpm. Work the buffer slowly from side to side and front to rear until most of the product is gone and gloss appears. Repeat as necessary until scratches are removed. For optimal finish follow with Tru-Polish[®] #1973.

FEATURES AND BENEFITS

Most aggressive and quickest cutting compound	Immediate cutting action won't overheat the surface
Leaves a high-gloss finish	Easily removes P1500 grit and finer sand scratches
Body shop safe	VOC compliant
